A.POC RelaxGuard

Sleeping restfully ... feeling safe and secure... being able to ignore the hustle and bustle around you whenever you want ... sounds great, doesn't it?

Our answer to this objective is A.POC RelaxGuard. This new product line allows for a particularly refreshing sleeping experience. It gives a central and balanced feeling on the mattress due to its firm frame and the firm outer springs give support right to the edge. This guarantees durability and comfort over the long term.

Let your customers have the experience of really restful sleep – and trust in A.POC RelaxGuard.

A.POC RelaxGuard I

- Feel the edge support but have a consistent overall look
- Enjoy a particularly smooth join between the central area and edge thanks to interlacing coils

A.POC RelaxGuard II

- Have a visually defined edge with a particularly high coil count
- Benefit from a very straight outline due to small-sized coil diameters in the framing area

Your benefits

STABILITY

Ensure a high level of stability at the seat edge without adding extra equipment such as flat steel frames

COMFORT

Make use of the benefits of innersprings for the whole mattress surface in place of foam

RECYCLABILITY

Reduce the number of different materials used and improve the environmental credentials of your mattress by using edge to edge innersprings - which are recyclable - in place of foam

FLEXIBILITY

Benefit from the option of rolling and folding your innerspring mattress for efficient logistics and modern distribution channels

Find out more

The product line A.POC RelaxGuard offers several potential specification options. Zoning is available on request.

Please contact us directly – we look forward to creating the RelaxGuard that best meets your needs.
